

HUNTS OF EDEN

SCENIC ASSEMBLY INSTRUCTIONS

**IT IS HIGHLY RECOMMENDED TO READ THROUGH ALL DIRECTIONS
BEFORE BEGINNING INITIAL ASSEMBLY.**

You Will Need:

- Wood Glue
- Duct Tape
- Black Artist's Tape
- Scissors/Blade (To open packaging)

Environment:

- It is suggested to build the model in the location it will be primarily used in order to prevent damage that may occur from repetitive reassembly. Pieces are built for repetitive use/manipulation but should be handled with care.

Questions:

- For any and all questions regarding assembly contact the designer:
Mallory Gabbard
512-981-9600

| | DECOR & ASSEMBLY |

FLOOR

1

Use Pieces: (F1; F2; F3)

- Begin by placing piece F2 in the center of your assembly area. (Ideally the floor will be permanently attached to your working surface via screws if possible). Arrange piece F1 & piece F3 on the 2 in. overlap of F2. Secure the pieces by applying wood glue to the 2" overlap (top side) on F2 as well as the 2" overlap on pieces F1 & F3 (underside). Let rest before progressing.

WALLS

2

Use Pieces: (A1 & A2)

- Slide pieces A1 & A2 together. All of the walls are built to slide together between layers of foam core & chip board. Walls were built in 2 part segments for ease of transportation/shipping. Ideally, the two pieces of wall will be permanently sealed together during assembly. After discovering how the pieces slide together, remove and add glue to the seams before putting back together and letting dry. When assembling pieces: A1; A2; D1; D2, secure closure on the black exterior side with duct tape. Allow glue time to harden before slotting walls into the floor.

3

Use Pieces: (A1 & A2)

- Slot the joined pieces A1 & A2 into the floor base on the side L side.

**** REPEAT****

Repeat steps 2 & 3 for pieces: (B1; B2; D1; D2)

4

Use Pieces: (A1; A2; B1; B2; D1; D2)

- All wall pieces should fit together on the interior so that they meet up at the corners as pictured.

5

Use Pieces: (A2; B1; D1; D2)

- Tape the top of piece A2 to D1 with black artists tape. Repeat for piece B1 to D2.

6

Use Pieces: (C1; C2; J1; J2)

- When assembling pieces C1 & C2, begin by slotting and securing together. Let dry. Slot the dowel extensions found on pieces J1 & J2 into the base of the floor (front side of doors lack the 1" overlap). Slowly lower the front wall piece down and slot the top dowels into the space provided.

7

Use Pieces: (G1; G2)

- Slide piece G1 into the bottom corner of piece A1 & C2. Slide piece G2 into the bottom corner of piece B2 & C1.

8

Use Pieces: (G1 & G2)

- Tape the top of pieces G1 & G2 to the interior of it's supporting pieces on the top. Take care to have as little tape as possible showing on the exterior side of the wall.

****STOP****

- Exterior of model should look like the pictures below (except for the roof).

LEGS

9

Use Pieces: (L1; L2; H1; H2)

- Slot lets into the floor base according to their position.

HAY LOFT

10

Use Pieces: (K1; K2; K3)

- K1: Goes on barn side R
- K2: Goes on barn side L
- K3: Goes on side barn back
- Begin with piece K3. The bottom of all Hay loft pieces have slots built into them. The legs beneath should slot into these squares and the back side of the hay loft should rest on the ledge built into the wall structure. After insetting piece K3. Move onto pieces K1 & K2. Make sure that all legs are correctly slotted into hay loft pieces before continuing on to the next step.

BANNISTERS

11

Use Pieces: (M1; M2)

- M1: Goes on barn side L
 - M2: Goes on barn side R
- Similar to the leg pieces; Slot the bannister pieces into the spaces provided on hay loft structure.

RAFTERS

12

Use Pieces: (E1; E2; E3)

- E1: Closest to Barn Side Front
 - E2: Middle (with slots on ends)
 - E3: Closest to Barn Side Back (rope)
- Slide rafter pieces into the supports provided from bannister pieces. Rafters should also slide into the slots provided on barn side L & barn side R walls. Piece E2 should hook onto the outside of wall pieces. Pieces E1 & E3 should be taped to wall pieces— being careful to show as little tape as possible on the exterior face of barn side R.

ROOF

It is easiest to assemble Roof pieces one side at a time in order to still be able to get into the structure in order to finish set-up. Suggested build side are pieces R1 & R2.

13

Use Pieces: (R1; R2)

- R1 & R2: Roof Front Facing
- R3 & R4: Roof Back Facing

- Slide Piece R1 & R2 together (similar to how wall pieces slid together). Secure together with glue and let rest before proceeding.

**** REPEAT****

Repeat step 13 for pieces (R3; R4)

14

Use Pieces: (R1; R2; R3; R4)

- The outer edges off the roof pieces have slots built that mount on either side of the walls barn side Front and barn side back.

- The two levels of supports on the inside of the roof should land as follows:
 - The support in the middle of the interior roof should land above side branches of the rafter pieces.
 - The support near the bottom of the interior roof should land just above the barn side wall.

- Reference photos below for position confirmation.

ROOF

14

Roof outer edge **OFF**

ROOF EDGE INTERIOR

**BARN SIDE FRONT
INTERIOR**

Roof outer edge **ON**

Middle Roof Support should land just above the extending supports from the rafter pieces

ROOF

14

Examples of middle and lower interior roof support placement.

Exact roof placement is only necessary on the outer edge alignment and middle roof support placement. If bottom roof alignment isn't perfect the structure will still be ok :)

**** REPEAT****

Repeat step 14 for Roof pieces R3 & R4 when desired.

DECOR

15

Use Pieces: (Hay bales; Ladders; Milk Jugs; etc.)

-Ladders are placed leaning on the hayloft on the barn side back and barn side L.
See photos for reference.

- Other decor placement is entirely up to you but feel free to use photo reference as desired.

DECOR
